2.18.5.2 Performance points obtained at all other WSPS Recognised Competitions will be valid in the ranking system for one year.

2.18.6 Value A (Rank Points)

2.18.6.1 The Value 'A' allocated will be determined by the rank an Athlete achieves, both in the qualification and final rounds.

2.18.6.2 A point value is allocated based on the rank in the qualification rounds (value A₁) and final round (value A₂):

Rank	Qualification Round Points (A ₁)	Final Round Points (A ₂)
1st rank	11	50
2nd rank	10	40
3rd rank	9	30
4th rank	8	20
5th rank	7	18
6th rank	6	16
7th rank	5	14
8th rank	4	12
9 th + rank	1	0

2.18.6.3 Value A is calculated as a sum of the points for the qualification and final ranking (values A₁ + A₂).

$$\begin{array}{rcl}
 \text{Qualification Rank Points} & + & \text{Final Rank Points} \\
 (A_1) & & (A_2) \\
 & & = \text{Value A}
 \end{array}$$

- 2.18.6.4 For non-Paralympic Events where no Finals are conducted, in the ranking calculations a value of zero will be assigned for the final rank points (value A₂).
- 2.18.6.5 If an Athlete ranks 1-8 in qualification but is DNS ("Did Not Start") in the final, in the ranking calculations a value of zero will be assigned for the final rank points (value A₂).

2.18.7 **Value B** (Competition weighting)

- 2.18.7.1 The Value B allocated will vary according to the level and significance of the Competition:

Competition	Code	Value B
Paralympic Games	PG	10
World Championships	WCH	8
Regional Games/Championships <i>(only valid for Regional Rankings)</i>	RG	6
World Cup	WC	6
Grand Prix	GP	2

2.18.8 **Value C** (qualification result points)

- 2.18.8.1 The Value C allocated is the qualification score achieved by the Athlete, divided by the world record in that Event (as of 01 January of the Competition year).
- 2.18.8.2 For both world and regional rankings, the world record will be used.

$$\frac{\text{Qualification Score}}{\text{World Record}} = \text{Value C}$$

2.18.9 **Calculation**

- 2.18.9.1 Performance points per Competition are calculated by multiplying together Values A, B and C.

Value A (Rank points)	×	Value B (Competition weighting)	×	Value C (Qualification result points)	=	Performance Points
---------------------------------	---	---	---	---	---	---------------------------

3.7.12 **Backrest slack**

- 3.7.12.1 The backrest may be made of hard or flexible material:
 - a) Backrests made from flexible material: the maximum slack (stretch) of the backrest (the distance from the front of the vertical side posts of the backrest to the deepest part of the backrest) shall not exceed 8cm.

- b) Backrests made from hard material: the backrest may be flat or with a curved surfaced; however, the maximum slack (depth of the curve) of the backrest (the distance from the front of the vertical side posts of the backrest to the deepest part of the backrest) shall not exceed 3cm. If the backrest is upholstered with compressible material, the maximum depth of the curve must still not exceed the permitted depth of 3cm when the material is compressed.

3.7.13.3 **Score C**

- a) The measurement will be taken from the middle of vertebra C7 - vertebra prominence.
- b) The measurement will be recorded on the Athlete's Classification and WSPS Licence as the minimum 'Visible Free Height'.

3.7.13.4 No part of the backrest may be higher than the minimum Visible Free Height as specified in the Athlete's WSPS Licence.

3.7.13.5 The Competition Jury shall:

- a) measure the Visible Free Height of each Athlete and ensure that it is not shorter than the minimum Visible Free Height indicated on the Athlete's WSPS Licence;
- b) place a piece of tape on the back of the Athlete's shooting jacket to indicate the Visible Free Height (the Visible Free Height will be indicated by the bottom edge of the tape). The tape must always remain visible during Competition.
- c) The Visible Free Height must be indicated on the start/BIB number.

3.8 Shooting Tables

3.8.1 Rifle Events

- b) The shape of the shooting table is free.
- c) If the shape of the table is curved (as in 'U-Form'), the shape of the curve must be wider than the Athlete's torso, so that the left and right side of the Athlete's abdomen cannot touch the table at the same time when in the prone position.

3.8.1.3 **Form - the construction of the shooting table may:**

- a) Either be attached to the Shooting Chair or free standing;
- b) Consist of a single table, or a multiple small individual tables;
- c) If two or more small individual tables are used:

 - II. The combined surface of the tables must meet all requirements as specified for shooting tables (size, angle, shape).

3.8.1.4 **Angle**

- a) The shooting table must be horizontal or at the same angle as the floor (measured at the centre of the table).
- b) A variation of ± 5 degrees is allowed.

3.8.1.5 **Support**

- a) The shooting table must not be used to gain support or stability for the body in any way, except for in the prone position.
- b) In the prone position, the table can provide support (but Athletes are not allowed to gain stability on the left or right side of the chair with the abdomen).

3.8.1.6 **Upholstering**

- a) The table or board may be upholstered with compressible material of a maximum thickness of 2cm.

 - II. an additional mounted support (hereafter '10cm block') added to the larger shooting table: a removable board with a diameter of 10cm and a thickness of at least 20mm.

3.8.1.8 **Shooting stand support**

- a) An additional separate board or table may be allowed for the rifle rest.

3.8.2 Pistol Tables

3.8.2.1 In the event that the range bench is fixed to the ground so the Athlete cannot get close enough to rest and load the pistol, or the bench is designed in such a way that means the Athletes' shooting position is compromised and cannot safely operate the loading procedure, the use of an additional small table may be permitted:

- a) the additional table must be presented at Equipment Control;
- b) the Competition Jury from Equipment Control will make an assessment on a case-by-case basis and will confirm if the use of an additional small table will be permitted; and
- c) the use of the table will be checked on the Firing Line by the Competition Jury to confirm that the table is used in a safe manner by the Athlete.

3.8.2.2 The additional table (if permitted) must be within the following specifications:

- a) Maximum size of 30cm x 30cm.
- b) Maximum height of 100cm.
- c) The table must in no way provide additional support to the Athlete in the shooting position.

3.9 SH2 rifle support stands

- 3.9.1 All SH2 Athletes must use an approved support stand (see **Appendix 5**) to support the weight of the rifle.
- 3.9.2 The Classification Panel will assess muscle power in the shooting arm (arm used to shoulder the rifle) for Athletes in Sport Class SH2 for the purpose of identifying if the Athlete may use a weak or a strong spring on the rifle support.
- 3.9.3 Depending on the Athlete's assessment score, they will be allocated a subclass; 'a' or 'b'.
- 3.9.4 This subclass will be recorded on the Athlete's WSPS Licence and determines which spring the Athlete shall use in their support stand:

Subclass	Spring Characteristics
a	WEAK SPRING (white plastic part) = flexibility minimum 35mm
b	STRONG SPRING (black plastic part) = flexibility minimum 25mm

- 3.9.5 The shooting stand may be fixed to the table or on a tripod.
- 3.9.6 No other support or mechanical devices may be used as a support for the rifle.
- 3.9.7 No device or substance may be attached to the rifle or the shooting stand in order to hold the rifle in a fixed position in, or against the shooting stand.
- 3.9.8 The Athlete's hands must not be placed in front of the spring or interfere with the operation of the spring when firing a shot.
- 3.9.9 The pin and the spring of the shooting stand must be in vertical position, front to back.
- 3.9.10 It is allowed to shorten the bottom part of the support stand. The remaining length needs to be at least 20mm, so that it will be possible to check the flexibility of the support stand during Equipment Control.
- 3.9.11 **Yoke (rifle holder)**
 - 3.9.11.1 The rifle must not contact both sides of the yoke at the same time.
 - 3.9.11.2 The yoke must be at least 1cm wider than the width of the rifle stock.
 - 3.9.11.3 It is allowed to add material inside the yoke if it is comparable to the surface of a shooting glove and does not interfere with the yoke measurements.
- 3.9.12 **Point of balance**
 - 3.9.12.1 The point of balance of the rifle must be marked at Equipment Control. The rifle must be placed ± 5 cm of its point of balance on the rifle support stand and the total 10cm range must be marked. The complete yoke must be within the 10cm range.
 - 3.9.12.2 The point of balance on gas or compressed air rifles will be measured with full containers.
 - 3.9.12.3 The total weight of the upper part of the support stand must be less than or equal to 200 grams. The spring must be an official WSPS-approved model (see **Appendix 5**).
- 3.9.13 **Test bar for spring flexibility (Appendix 5)**
 - 3.9.13.1 Weight and tolerances for testing the flexibility of the springs are:
 - a) Bar 1) 250 Grams +2 - 0 (used for zeroing)
